DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Salvo et al. '271 in view of Shavit et al. '156.

Salvo et al. disclose, or inherently teach, all of the limitations of the claims including a means for selecting suppliers in a supply chain management framework; including receiving data from a facility in a supply chain network, the data relating to the sale of goods (i.e., depletion of inventory); generating an electronic order for ordering goods; receiving supplier information (i.e., best price, see for example Col. 6) from a management headquarters (i.e., computer control unit 114 or service center 175); and using the supplier information to transmit the electronic order to selected suppliers using a network.

Salvo et al. lack the specific teaching of the system/method being for use by a store; and generating an electronic order form for ordering goods.

Shavit et al. disclose, or at least inherently teach, a similar network supply chain management system for use by stores whereby an electronic order form is utilized for ordering goods (See Col. 6, for example).

Art Unit: 3627

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Salvo et al. to have the system/method be for use by a store and generating an electronic order form, as taught by Shavit et al., in order to provide a "system for interactive on-line electronic communications and processing of business transactions between a plurality of sellers and a plurality of buyers" (see Shavit et al. Col. 2, lines 16-20).

Re claims 6, 12, and 18; the "performance information" limitation is taught by the lowest price teaching in Salvo et al., Col. 6.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
